

Dear cowboys,

As you may have already noticed, we will be shooting Wild Bunch match as part of 2010 Czech Championship.

However, this is completely new shooting style for our shooters and therefore we have decided not to follow the SASSWB handbook to the full extent. The reasons are mainly driven by the fact that our cowboys are still not properly equipped with relevant gear and also we want to make this discipline more popular here by allowing as many people as possible to participate. We have therefore decided to adjust the rules accordingly. After certain trial period we will move fully to the SASSWB rules. The changes are as follows:

#### Categories

There will be only one category, no split per guns used or gender, age, etc.

#### Pistols

The 1911 is not as popular in our country as in the US, therefore we are more benevolent here. Any 1911 style pistol in 45 ACP as per Traditional or Modern SASSWB categories is allowed. On top of that, the following features are also allowed: double stack magazine, Bull barrel, barrel shorter than 5" (Commander).

Range operations as per SASSWB handbook.

#### Rifles

As per SASSWB handbook but all CAS Main match calibers are allowed.

Range operations as per SASSWB handbook.

#### Shotguns

As per SASSWB handbook, but also lever action and double barrel (although being an obvious disadvantage) shotguns are allowed.

Range operations:

Pump – as per SASSWB handbook

Lever action – action to be opened before loading, when loaded the action must be closed on empty chamber. The rest as per SASSWB handbook.

Double – carried unloaded and break open to firing line, the only exception is when the shotgun is the first gun to be shot. In that case it can be loaded at the firing line under supervision of the RO. Then it can be shot directly after the beep. The rest as per SASSWB handbook.
